

ChurnIQ

AI-Powered Customer Retention Intelligence

Built by Ayush Kumar Jha

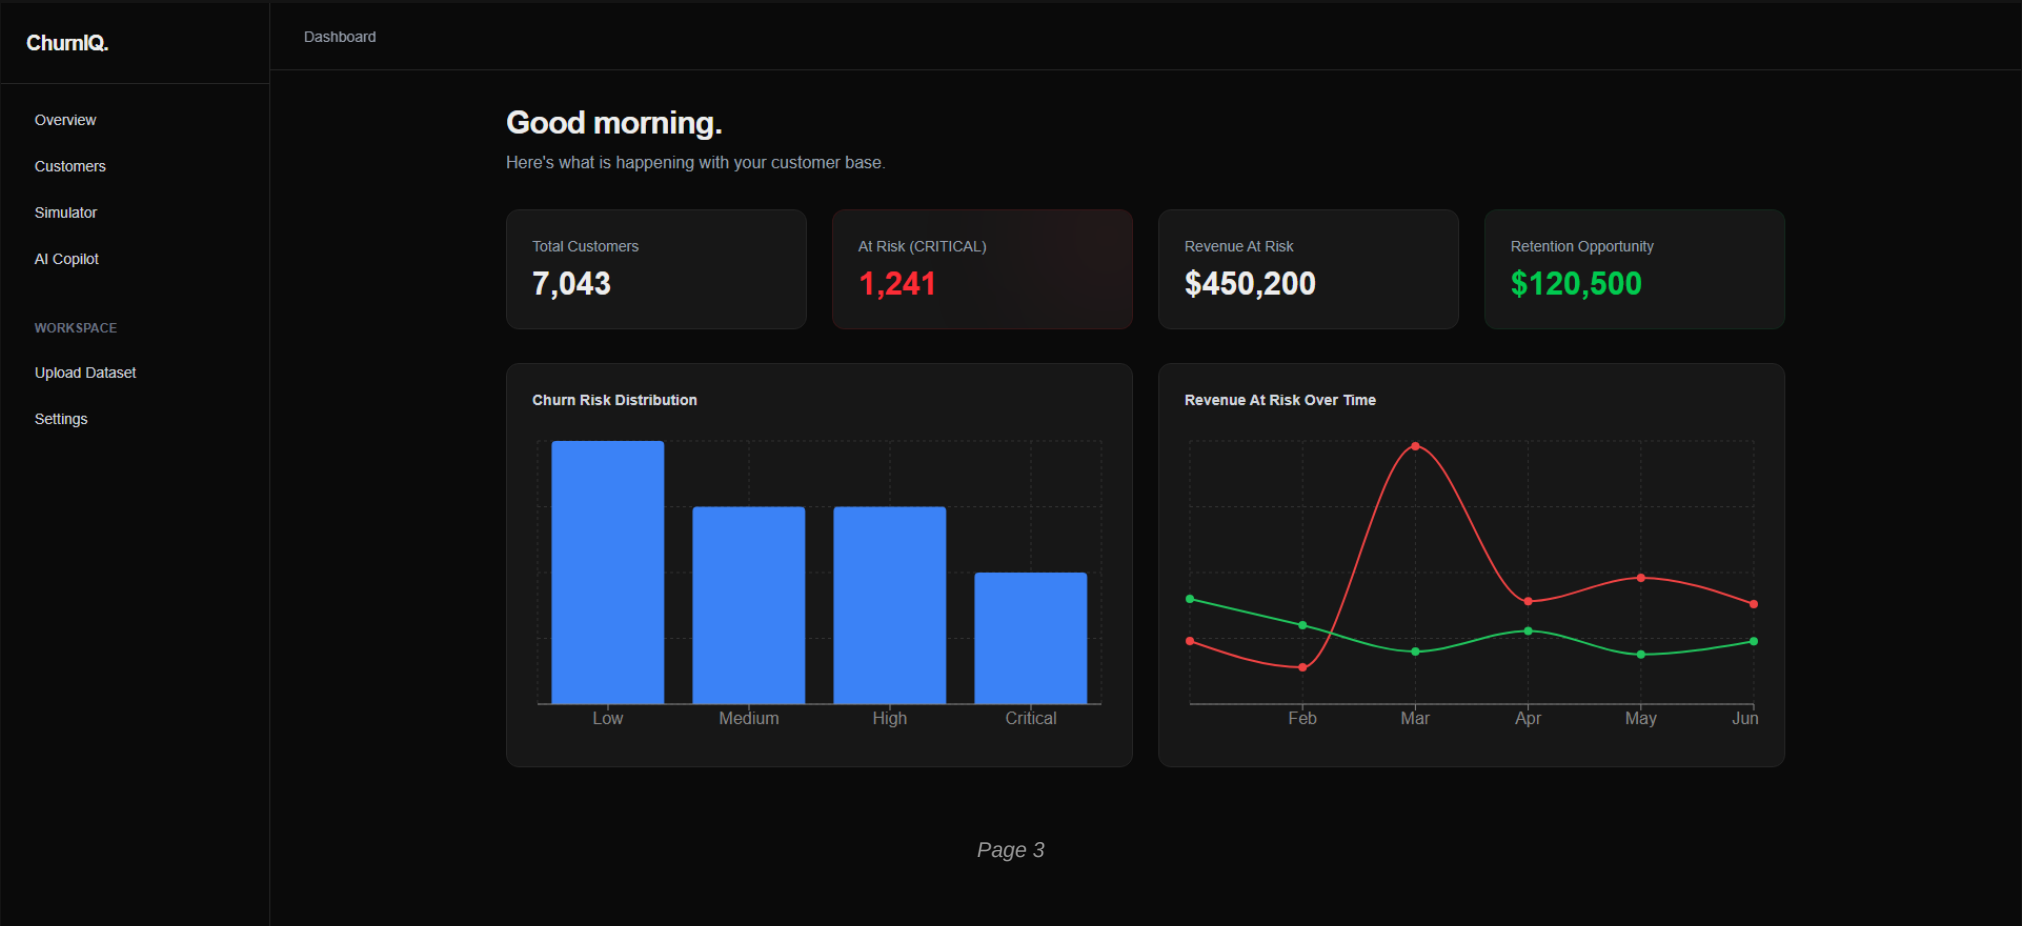

1. The Premium Interface

A modern Next.js frontend built with Tailwind CSS, providing a seamless B2B SaaS experience.

2. Executive Analytics Dashboard

Real-time interactive KPI tracking powered by FastAPI and Recharts, converting raw data into revenue metrics.

3. Customer Risk Intelligence

Gradient Boosting ML models calculate exact churn probability, automatically recommending tailored retention actions.

ChumIQ.

The Architecture

Frontend

- Next.js (App Router)
- React & TypeScript
- Tailwind CSS
- Recharts

Backend API

- FastAPI (Python)
- SQLAlchemy
- Uvicorn

Machine Learning

- Scikit-Learn
- SHAP Explainability
- Pandas & NumPy
